

## To Prevent the Spread of COVID-19

If you think you might have COVID-19, please note the following points when disposing of your garbage.

### ◆ Burnables (used masks and tissues, leftover food waste, etc.)

- Put the garbage into a small bag, paying attention not to touch the garbage. Make sure to tie the bag tightly.

- Do not pack too much garbage. Let excess air escape from the bag so that it will not burst.

- Put the small bag in a City-designated burnable garbage bag (green) and put it out.

### ◆ Other garbage

(Plastic waste, non-burnables, recyclables A / B, hazardous waste, bulk waste)

For items that do not go bad easily or that do not have to be disposed of quickly, store the garbage at home for about a week. Then put it out on the designated collection day.

-We ask for your cooperation and understanding to prevent the spread of COVID-19 to those who are involved in the collection and disposal of garbage generated every day.
